## Precautions

## Correct Use

## Soldering

Observe the following conditions when soldering the Switch.

## Automatic Soldering Bath

Soldering temperature: $260^{\circ} \mathrm{C}$ max. (Preheating: $100^{\circ} \mathrm{C} 120$ s) Soldering time: 5 s max.

## Manual Soldering

Soldering temperature: $350^{\circ} \mathrm{C}$ at the tip of the soldering iron. Soldering time: 3 s max.

## Washing

Apply alcohol based solvents to clean.
Do not clean the switch immediately after soldering. Wait for at least five minutes after soldering before cleaning.
Ultrasonic cleaning is not available dip into the switch washing agents for two minute maximum.

## Using Flux

Making mistakes in the type of flux or in the amount or method in which it is applied can cause flux to enter the interior of the Switch, with adverse effects on Switch performance. Assess the proper flux, conditions, and methods prior to using it.

## Environment for Storage and Use

To prevent discoloration of the terminals and other problems during storage, do not store the switch in locations subject to the following conditions.

1. High temperatures or humidity
2. Corrosive gases
3. Direct sunlight

Also, the switch is not waterproof or splash-resistant. Do not install or use the switch in locations that are subject to contact with water. Do not subject the switch to freezing or condensation.

## Cautions

Use the Toggle Switch within the rated voltage and current ranges, otherwise the Toggle Switch may have a shortened life expectancy, radiate heat, or burn out. This particularly applies to the instantaneous voltages and currents when switching.

## Handling

Do not apply excessive operating force to the Switch. Otherwise the Switch may be damaged or deformed, and the switch mechanism may malfunction as a result. Apply an operating force not exceeding $9.8 \mathrm{~N}(1,000 \mathrm{gf})$. Apply the operating load from the side of the striker in the direction of actuation travel. Do not apply a load from an angle or from above the striker. Doing so may deform the Switch contact.

## RoHS Compliant

The "RoHS Compliant" designation indicates that the listed models do not contain the six hazardous substances covered by the RoHS Directive.
Reference: The following standards are used to determine compliance for the six substances.

| Lead: | $1,000 \mathrm{ppm}$ max. |
| :--- | :--- |
| Mercury: | $1,000 \mathrm{ppm}$ max. |
| Cadmium: | 100 ppm max. |
| Hexavalent chromium: | $1,000 \mathrm{ppm}$ max. |
| PBB: | $1,000 \mathrm{ppm}$ max. |
| PBDE: | $1,000 \mathrm{ppm}$ max. |
