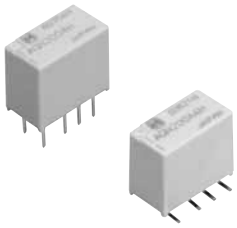
High Sensitivity of nominal operating power 100mW is achived. Compact Slim Body Saves space

GN RELAYS (AGN)



FEATURES

1. **Compact slim body saves space**
   Thanks to the small surface area of 5.7 mm × 10.6 mm .224 inch × .417 inch and low height of 9.0 mm .354 inch, the packaging density can be increased to allow for much smaller designs.
2. **High sensitivity single side stable type (Nominal operating power: 100mW) is available**
3. **Outstanding surge resistance.**
   Surge breakdown voltage between contacts and coil:
   2,500 V 2×10 μs (Telcordia)
   Surge breakdown voltage between open contacts:
   1,500 V 10×160 μs (FCC part 68)
4. **The use of twin crossbar contacts ensures high contact reliability.**
   AgPd contact is used because of its good sulfide resistance. Adopting low-gas molding material. Coil assembly molding technology which avoids generating volatile gas from coil.
5. **Increased packaging density**
   Due to highly efficient magnetic circuit design, leakage flux is reduced and changes in electrical characteristics from components being mounted close-together are minimized. This all means a packaging density higher than ever before.
6. **Nominal operating power: 140 mW**
7. **Outstanding vibration and shock resistance.**
   Functional shock resistance: 750 m/s²
   Destructive shock resistance:
   1,000 m/s²
   Functional vibration resistance:
   10 to 55 Hz (at double amplitude of 3.3 mm .130 inch)
   Destructive vibration resistance:
   10 to 55 Hz (at double amplitude of 5 mm .197 inch)
8. **Sealed construction allows automatic washing.**

TYPICAL APPLICATIONS

1. **Telephone switchboard**
2. **Telecommunications equipment**
3. **Security**
4. **Measurement equipment**
5. **Consumer electronic and audio visual equipment**

Compliance with RoHS Directive

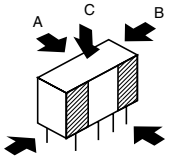
2. Automatic insertion

To maintain the internal function of the relay, the chucking pressure should not exceed the values below.

Chucking pressure in the direction A:
4.9 N {500gf} or less

Chucking pressure in the direction B:
9.8 N {1 kgf} or less

Chucking pressure in the direction C:
9.8 N {1 kgf} or less



Please chuck the ▨ portion.
Avoid chucking the center of the relay.
In addition, excessive chucking pressure to the pinpoint of the relay should be avoided.

For general cautions for use, please refer to the "Cautions for use of Signal Relays" or "General Application Guidelines".
