# Notice for TAIYO YUDEN products

# Please read this notice before using the TAIYO YUDEN products.

# **!** REMINDERS

Product information in this catalog is as of October 2015. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or usage of the Products.

Please note that TAIYO YUDEN CO., LTD. shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this catalog or individual specification.

Please contact TAIYO YUDEN CO., LTD. for further details of product specifications as the individual specification is available.

Please conduct validation and verification of products in actual condition of mounting and operating environment before commercial shipment of the equipment.

All electronic components or functional modules listed in this catalog are developed, designed and intended for use in general electronics equipment.(for AV, office automation, household, office supply, information service, telecommunications, (such as mobile phone or PC) etc.). Before incorporating the components or devices into any equipment in the field such as transportation,( automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network (telephone exchange, base station) etc. which may have direct influence to harm or injure a human body, please contact TAIYO YUDEN CO., LTD. for more detail in advance.

Do not incorporate the products into any equipment in fields such as aerospace, aviation, nuclear control, submarine system, military, etc. where higher safety and reliability are especially required.

In addition, even electronic components or functional modules that are used for the general electronic equipment, if the equipment or the electric circuit require high safety or reliability function or performances, a sufficient reliability evaluation check for safety shall be performed before commercial shipment and moreover, due consideration to install a protective circuit is strongly recommended at customer's design stage.

The contents of this catalog are applicable to the products which are purchased from our sales offices or distributors (so called "TAIYO YUDEN' s official sales channel").
It is only applicable to the products purchased from any of TAIYO YUDEN', a official sales channel

It is only applicable to the products purchased from any of TAIYO YUDEN's official sales channel.

Please note that TAIYO YUDEN CO., LTD. shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from your usage of products in this catalog. TAIYO YUDEN CO., LTD. grants no license for such rights.

# Caution for export

Certain items in this catalog may require specific procedures for export according to "Foreign Exchange and Foreign Trade Control Law" of Japan, "U.S. Export Administration Regulations", and other applicable regulations. Should you have any question or inquiry on this matter, please contact our sales staff.

## TAIYO YUDEN 2016

# METAL CORE SMD POWER INDUCTORS(MCOIL<sup>™</sup> MD SERIES)

### PARTS NUMBER

M D	КК	1	6	1	6	Т	1	R	0	М	М	$\triangle$
1	2		(	3)		4		5		6	$\bigcirc$	8

(1)Series name

※) The saturation current value (Idc1) is the DC current value having inductance decrease down to 30% (at 20°C)

\*) The temperature rise current value (Idc2) is the DC current value having temperature increase up to 40°C. (at 20°C)

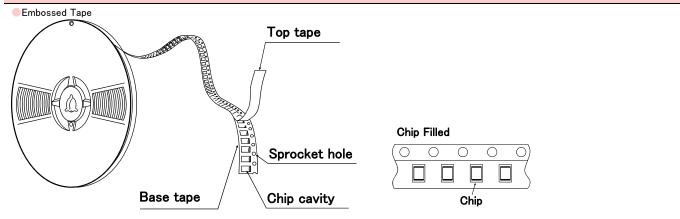

\*) The rated current is the DC current value that satisfies both of current value saturation current value and temperature rise current value.

# METAL CORE SMD POWER INDUCTORS (MCOIL<sup>™</sup> MD SERIES)

RELIABILITY DATA					
1. Operating Tempe	1. Operating Temperature Range				
Specified Value	MD series	-40~+125°C			
Test Methods and Remarks	Including self-generated heat				
2. Storage Tempera	ture Range				
Specified Value	MD series	-40~+85°C			
Test Methods and Remarks	-5 to 40°C for the product with taping.				
3. Rated current					
Specified Value	MD series	Within the specified tolerance			
4. Inductance					
Specified Value	MD series	Within the specified tolerance			
Test Methods and Remarks	Measuring equipment : LCR Meter(HP 4 Measuring condition : Please see item lis				
5. DC Resistance	5. DC Resistance				
Specified Value	MD series	Within the specified tolerance			
Test Methods and Remarks	nd Measuring equipment : DC ohmmeter (HIOKI 3227 or equivalent)				
6. Self resonance fr	6. Self resonance frequency				
Specified Value	MD series	-			
7. Temperature characteristic					
Specified Value	MD series	Inductance change : Within $\pm 10\%$			
Test Methods and	Measurement of inductance shall be taken at				
Remarks	With reference to inductance value at $+20^\circ$	C., change rate shall be calculated.			
8. Resistance to fle	xure of substrate				

Specified Value	MD series		No damage
	The test samples shall be s until deflection of the test		st board by the reflow. As illustrated below, apply force in the direction of the arrow indicating 2 mm.
Test Methods and Remarks	Test board size Test board material Solder cream thickness	: 100 × 40 × 1.0 : Glass epoxy-re : 0.10 mm	10/
Nemarks			R5 45±2mm

9. Insulation resistance : between wires			
Specified Value	MD series	-	

10. Insulation resistance : between wire and core			
Specified Value	MD series	-	
11. Withstanding voltage : between wire and core			
Specified Value	MD series	-	

12. Adhesion of terr	12. Adhesion of terminal electrode				
Specified Value	MD series		Shall not come off PC board		
Test Methods and Remarks	The test samples shall be soldered to the te Applied force : 10N to X and Duration : 5s. Solder cream thickness : 0.10mm.		•		

13. Resistance to vibration				
Specified Value	MD series		Inductance change : Within $\pm 10\%$ No significant abnormality in appearance.	
	The test samples shall be soldered to the test board by the reflow.			
	Then it shall be submitted	to below test cond	ditions.	
	Frequency Range	10~55Hz		
To at Mathematic and	Total Amplitude	1.5mm (May not	exceed acceleration 196m/s²)	
Test Methods and Remarks	Sweeping Method	10Hz to 55Hz to	o 10Hz for 1min.	
Remarks	Time	Х	For 2 hours on each X, Y, and Z axis.	
		Y		
		Z		
	Recovery : At least 2hrs of recovery under the standard condition after the test, followed by the measurement within 48hrs.			

14. Solderability				
Specified Value	MD series		At least 90% of surface of terminal electrode is covered by new solder.	
<b>T</b> . <b>M</b>	The test samples shall be dipped in flux, and then immersed in molten solder as shown in below table. Flux : Methanol solution containing rosin 25%.			
Test Methods and Remarks	Solder Temperature	245±5°C		
Remarks	Time	5±1.0 sec.		
	XImmersion depth : All sides of mounting terminal shall be immersed.			

15. Resistance to se	15. Resistance to soldering heat			
Specified Value	MD series	Inductance change : Within $\pm 10\%$ No significant abnormality in appearance.		
Test Methods and Remarks	The test sample shall be exposed to reflow oven at $230\pm5^{\circ}$ C for 40 seconds, with peak temperature at $260\pm5^{\circ}$ C for 5 seconds, 2 times Test board material : Glass epoxy-resin Test board thickness : 1.0mm			

16. Thermal shock					
Specified Value	MD series			nductance change : N o significant abnorm	
		•	elow table	•	he test samples shall be placed at specified temperature for specified emperature cycle shall be repeated 100 cycles.
Test Methods and	Step	tep Temperature (°C)		uration (min)	
Remarks	1 -40±3			30±3	
	2	Room temperature		Within 3	
	3	$+85\pm2$		30±3	
	4	Room temperature		Within 3	

17. Damp heat			
Specified Value	MD series		Inductance change : Within $\pm 10\%$ No significant abnormality in appearance.
Test Methods and	The test samples shall be soldered to the test board by ods and The test samples shall be placed in thermostatic over s		t board by the reflow. atic oven set at specified temperature and humidity as shown in below table.
Remarks	Temperature	60±2°C	
	Humidity	90~95%RH	
	Time	500+24/-0 hour	

18. Loading under d	amp heat		
Specified Value	MD series		Inductance change : Within $\pm$ 10% No significant abnormality in appearance.
Test Methods and	The test samples shall be soldered to the test board by the reflow. The test samples shall be placed in thermostatic oven set at specified temperature and humidity and applied the rated current continuously as shown in below table.		
Remarks	Temperature Humidity	60±2°C 90~95%RH	-
	Applied current Time	Rated current $500+24/-0$ hour	-

19. Low temperature life test			
Specified Value	MD series		Inductance change : Within $\pm 10\%$ No significant abnormality in appearance.
Test Methods and	The test samples shall be soldered to the test board by the reflow. After that, the test samples shall be placed at test conditions as sh in below table.		board by the reflow. After that, the test samples shall be placed at test conditions as shown
Remarks	Temperature	$-40\pm2^{\circ}C$	
	Time	500+24/-0 hour	

20. High temperature life test		
Specified Value	MD series	_

21. Loading at high temperature life test			
Specified Value	MD series		Inductance change : Within $\pm 10\%$ No significant abnormality in appearance.
Test Methods and	The test samples shall be soldered to the test board by the reflow. The test samples shall be placed in thermostatic oven set at specified temperature and applied the rated current continuously as shown in below table.		
Remarks	Temperature	85±2°C	
	Applied current	Rated current	
	Time	500+24/-0 hour	

22. Standard condition		
Specified Value	MD series	Standard test condition : Unless otherwise specified, temperature is $20\pm15^{\circ}$ C and $65\pm20\%$ of relative humidity. When there is any question concerning measurement result: In order to provide correlation data, the test shall be condition of $20\pm2^{\circ}$ C of temperature, $65\pm5\%$ relative humidity. Inductance is in accordance with our measured value.

TAIYO YUDEN

### PRECAUTIONS

1. Circuit Design	
Precautions	<ul> <li>Operating environment</li> <li>The products described in this specification are intended for use in general electronic equipment, (office supply equipment, telecommunications systems, measuring equipment, and household equipment). They are not intended for use in mission-critical equipment or systems requiring special quality and high reliability (traffic systems, safety equipment, aerospace systems, nuclear control systems and medical equipment including life-support systems,) where product failure might result in loss of life, injury or damage. For such uses, contact TAIYO YUDEN Sales Department in advance.</li> </ul>

2. PCB Design	2. PCB Design		
Precautions	<ul> <li>◆Land pattern design</li> <li>1. Please refer to a recommended land pattern.</li> </ul>		
Technical considerations	<ul> <li>Land pattern design</li> <li>Surface Mounting</li> <li>Mounting and soldering conditions should be checked beforehand.</li> <li>Applicable soldering process to this products is reflow soldering only.</li> </ul>		

3. Considerations	3. Considerations for automatic placement		
Precautions	<ul> <li>Adjustment of mounting machine</li> <li>1. Excessive impact load should not be imposed on the products when mounting onto the PC boards.</li> <li>2. Mounting and soldering conditions should be checked beforehand.</li> </ul>		
Technical considerations	<ul> <li>Adjustment of mounting machine</li> <li>1. When installing products, care should be taken not to apply distortion stress as it may deform the products.</li> </ul>		

4. Soldering	
Precautions	<ul> <li>Reflow soldering <ol> <li>Please contact any of our offices for a reflow soldering, and refer to the recommended condition specified.</li> <li>The product shall be used reflow soldering only.</li> <li>Please do not add any stress to a product until it returns in normal temperature after reflow soldering.</li> <li>Lead free soldering <ol> <li>When using products with lead free soldering, we request to use them after confirming adhesion, temperature of resistance to soldering heat, soldering etc sufficiently.</li> </ol> </li> <li>Recommended conditions for using a soldering iron (NR10050 Type) <ol> <li>Put the soldering iron on the land-pattern.</li> <li>Soldering iron's temperature - Below 350°C</li> <li>Duration - 3 seconds or less</li> <li>The soldering iron should not directly touch the inductor.</li> </ol> </li> </ol></li></ul>
Technical considerations	<ul> <li>Reflow soldering</li> <li>If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products.</li> <li>•NR30/40/50/60/80, NRV20/30, NRH24/30, NRS20/40/50/60/80 Type, NR10050 Type, NS101/125 Type Recommended reflow condition (Pb free solder) 300 <u>300</u> <u>300</u> <u>5sec max</u> <u>200</u> <u>150~180</u> <u>90±30sec</u> <u>30±10sec</u> <u>30±10sec</u> Heating Time[sec] Heating Time[sec]         </li> </ul>

5. Cleaning	5. Cleaning	
Precautions	<ul> <li>Cleaning conditions</li> <li>1. Washing by supersonic waves shall be avoided.</li> </ul>	
Technical considerations	<ul> <li>Cleaning conditions</li> <li>1. If washed by supersonic waves, the products might be broken.</li> </ul>	

6. Handling	
Precautions	<ul> <li>Handling <ol> <li>Keep the product away from all magnets and magnetic objects.</li> <li>Breakaway PC boards (splitting along perforations) <ol> <li>When splitting the PC board after mounting product, care should be taken not to give any stresses of deflection or twisting to the board.</li> <li>Board separation should not be done manually, but by using the appropriate devices.</li> </ol> </li> <li>Mechanical considerations <ol> <li>Please do not give the product any excessive mechanical shocks.</li> <li>Please do not add any shock and power to a product in transportation.</li> </ol> </li> <li>Pick-up pressure <ol> <li>Please do not push to add any pressure to a winding part. Please do not give any shock and push into a ferrite core exposure part.</li> </ol> </li> <li>Packing <ol> <li>Please avoid accumulation of a packing box as much as possible.</li> </ol> </li> <li>Board mounting <ol> <li>There shall be no pattern or via between terminals at the bottom of product.</li> </ol> </li> <li>Components which are located in peripheral of product shall not make contact with surface (top, side) of product.</li> </ol> </li> </ul>
Technical considerations	<ul> <li>Handling <ol> <li>There is a case that a characteristic varies with magnetic influence.</li> <li>Breakaway PC boards (splitting along perforations) <ol> <li>The position of the product on PCBs shall be carefully considered to minimize the stress caused from splitting of the PCBs.</li> </ol> </li> <li>Mechanical considerations <ol> <li>There is a case to be damaged by a mechanical shock.</li> <li>There is a case to be broken by the handling in transportation.</li> <li>Pick-up pressure <ol> <li>Damage and a characteristic can vary with an excessive shock or stress.</li> </ol> </li> <li>Packing <ol> <li>If packing boxes are accumulated, that could cause a deformation on packing tapes or a damage on the products.</li> </ol> </li> <li>Board mounting <ol> <li>If there is pattern or via between terminals at the bottom of product, it may cause characteristics change.</li> </ol> </li> <li>If components which are located in peripheral of product make contact with surface (top, side) of product, it may cause damage or characteristics change.</li> </ol> </li> </ol></li></ul>

7. Storage conditions		
Precautions	<ul> <li>Storage         <ol> <li>To maintain the solderability of terminal electrodes and to keep the packing material in good condition, temperature and humidity in the storage area should be controlled.             <ul> <li>Recommended conditions</li></ul></li></ol></li></ul>	
Technical considerations	<ul> <li>Storage</li> <li>1. Under a high temperature and humidity environment, problems such as reduced solderability caused by oxidation of terminal electrodes and deterioration of taping/packaging materials may take place.</li> </ul>
