

1. INTRODUCTION

LIGHTRAY MPX Open Directors 1374703-[] (14 mm) and 1374999-[] (11 mm) are designed to be installed onto LIGHTRAY MPX connectors to provide strain relief for the cable.

2. DESCRIPTION

The open director is installed onto the cable by fitting the cable into the channel in the back of the cable director, then sliding cable director onto the connector. After installation, the open director can be re-positioned in relation to the connector to suit the application.

3. RE-POSITIONING OPEN DIRECTOR

Refer to Figure 1, and proceed as follows:

1. Lift the cable out of the channel in the back of the open director.
2. Slide the open director back along the cable until it is free from the connector.
3. Holding the connector in position, rotate the open director to the desired position (maximum 180 degrees either direction). Make sure that the cable is not twisted.
4. Slide the open director onto the connector until it stops.
5. Re-position the cable into the channel in the back of the open director.

4. REVISION SUMMARY

Revisions to this instruction sheet include:

- Updated document to corporate requirements
