# Incandescent Indicators with Round or Square Plastic Lens Caps

FOR MOUNTING IN 15/32" or 1/2" CLEARANCE HOLE

These indicator lights offer a choice of friction fit 1/2" or 3/4" round or square plastic lens caps. These caps are effectively lighted by T-1-3/4 lamps which extend completely into the luminous portion. Fine solid color effects are obtained. The two-part construction permits opaque sides with lighted colored faces; also two-color caps with sides and faces which are different.

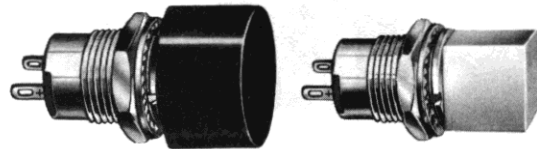

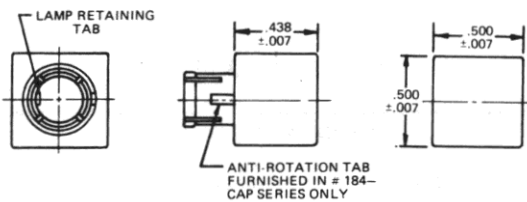

All assemblies can also be furnished with lens caps having solid white translucent or opaque sides and translucent white top with underlying colored filter. This would result in the complete lens cap or top only being visible as white when not energized and in another color when the assembly is energized. While not illustrated, these lens cap assemblies are listed in the charts below and on the facing page for your convenience in ordering.

Legends are displayed on the flat faces. They can be hot-stamped or engraved.

Lens caps listed in the chart below are **non-rotatable**, permitting them to be pushed into place only in a **pre-determined** position. Lens caps may also be **rotated**, permitting legends or cap edges to be easily brought into alignment after installation of the assembly. Appropriate part numbers are footnoted under the chart.

**ANTI-ROTATION (LOCKED) CONSTRUCTION:** Unique features provide for secure locking of the socket terminal assembly in the mounting bushing and of the center terminal to the insulating dic. The end of the mounting bushing is notched to receive the matched eccentric insulating disc and the opposed flanges are rolled over the disc. It is held securely and cannot be rotated. The eccentric shaped disc provides extra electrical insulation from terminals to bushing. The terminal to the center socket contact is keyed to the insulating disc to make it non-rotating.

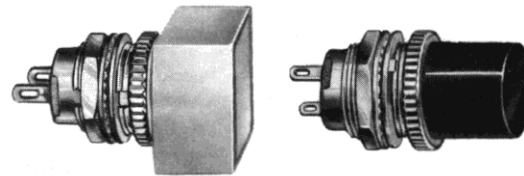

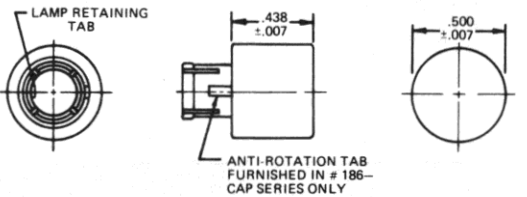

## 1/2" Square Lens Cap—Nos. 184— and 185—

188-9730-1471-602      184-9730-1871-602

Mount in 15/32" clearance hole  
front of panel insertion  
with fixed flange

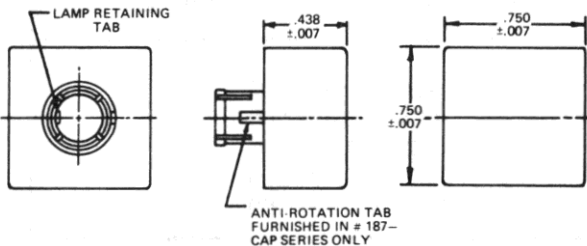

## 1/2" Round Lens Cap—Nos. 183— and 186—

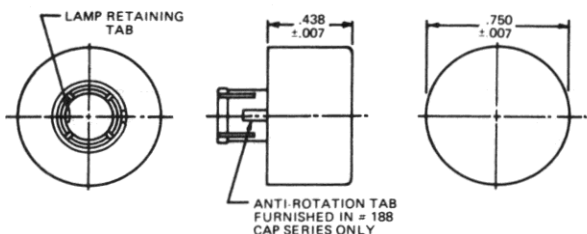

187-9830-1871-604      186-9830-1471-604

Mount in 1/2" clearance hole  
front or back of panel inserion  
with movable flange

## 3/4" Square Lens Cap—Nos. 187— and 190—

## 3/4" Round Lens Cap—Nos. 188— and 191—
