

Voltage converter IC for cellular phones

BH6040FVM

● Description

The BH6040FVM is an IC having the charging-pump type voltage converter for white LED. Maximum output current is 80mA and the internal oscillating frequency is 650kHz. The reduction of power ripple can be realized due to the built-in regulator on the primary side. Output (ON/OFF) can be controlled by the external signal and current consumption at OFF is 1μA (Max).

● Dimension (Units : mm)

MSOP8

● Features

- 1) Switched capacitor type voltage converter (5.0V output)
- 2) Easy to solve the noise problems in the VIN side (input side)
- 3) Built-in SHUTDOWN SW (ON/OFF control)
- 4) Very small MSOP8 package

● Applications

Cellular phones, Overseas cellular phones
