Currently, heavy-duty connectors are used wherever there is a need for a secure, simple and time-saving assembly of machinery and facilities. The connector housings are made of die-cast aluminium and offer excellent protection against dirt, moisture and mechanical stress. Special modular connectors make it possible to integrate signals, power supply, pneumatics, and Fieldbus connections into one connector. With its new RockStar® heavy-duty connectors, Weidmüller offers a future-oriented product line with many patented innovations. It makes up one of the world's largest offerings. It features the outstanding stainless steel clips in a standard enclosure, with the uniquely simple PUSH IN connection.
