

Screw Connectors for Printed Circuit Boards

140-C-111 | 5.00 mm (0.197 in) Spacing - 2-24 poles

PICTURES

140-C-111

TECHNICAL INFORMATION

Description

Can be installed anywhere on PCB without wires or screws interfering with the rest of PCB. Can be located next to each other back-to-back, front-to-front and front-to-back. The screws and wire entries are easily visible, accessible and usable, an ergonomic advantage.

Wire entrance at 45 angle to PC Board

Dovetail version

Elevator-style clamping mechanism

Can be installed anywhere on PCB without wires or screws interfering with other components

Can be factory, field or distributor assembled to almost any length

Technical Data

Center to Center Spacing: 5.000 mm (0.197 in)

Nominal Cross Section: 1.5 mm² (2325 mils²)

Wire Stripping Length: 6.000 mm (0.236 in)

Recommended Hole Diameter in PC Board: 1.200 mm (0.047 in)

Bill of Materials

Molding : Polyamide, Self extinguishing UL 94, V-0

Color : Grey

Temperature limits :

Short Time : 140°C (284°F)

Continuous : 105°C (221°F)

Low Limit : -40°C (-40°F)

Comparative Tracking Index : CTI ? 600 V

Oxygen Index Rating : 33 %

Terminal Body: Nickel plated copper alloy

Solder Pin and Pressure Plate: Tin plated copper alloy

Screw: Slotted head, zinc plated blue passivated, steel substrate M3

Solder Pin: 0.9 mm x 0.5 mm (0.04 in. x 0.02 in.)

APPROVAL INFORMATION

UL File No. E69841 | CSA File No. LR24322

Type	Current (A)	Voltage (V)	Application Group	AWG	Screw Tightening Torque
 140-C-111 5.0 mm	10	300	B, D	30-14	4.5 lbfin
 140-C-111 5.0 mm	15 10	300 150	B D, E	30-14 30-14	0.51 lbfin 0.51 lbfin

UL: 20A range for factory wiring only.

International Approval Information**Rated Impulse Withstand Voltage : 2500 V**

TECHNICAL DRAWING

Description :

Length of Connector (L)

L = No. of Poles x Center to Center Spacing

SECTION A - SERIES 14 MINI-LIFT AND MIDI-LIFT

Terminal Blocks for Printed Circuit Boards

Series 14 terminal blocks feature an elevator-style clamping mechanism which provides high contact pressure, great resistance to loosening due to vibration, and allows for almost unlimited connection cycles. All products are equipped with captive screws and a dovetail interlocking feature which allows all pole versions to be assembled to the required pole configurations while maintaining 5 mm (or 5.08 mm) center-to-center spacing.

These products are monolithic up to 24 poles and they all have the dovetail feature. Thus they can be clipped together in any combination by the user. WECO ships a single piece unit when it is possible. Single level will be a single piece unit. Double and triple decker product will be made of combinations.

Single, double and triple level horizontal, vertical, and 45-degree wire entry directions are available in the series 14. Due to its larger size, the 145/146 (midi-lift) is rated for greater current capacity than the smaller 140/141 (mini-lift).

Series 14 delivers high quality connections able to resist vibrations using an industry standard operating mechanism.

Each product has a "How To Order" area as well as a complete listing of UL and CSA approval specifications, available options and accessories.
