

Irradiated PVC Hook-Up Wire

UL Style 1429 • VW-1 • CSA AWM • XLPVC MIL-W-16878 • TYPE B • 600V

Description: One conductor, tinned copper with .010" irradiated PVC insulation (XLPVC). Daburn's irradiated PVC Hook-up wire is made from extruded polyvinyl chloride insulation which has been exposed to controlled radiation. This exposure causes the insulation to become far superior to ordinary PVC in temperature, abrasion and cut-through resistance. It can withstand direct contact with a soldering iron and it will not shrink back, melt or deform. Ideal for hi-density wiring.

Temperature Rating: -55°C to +105°C (UL 1429: 80°C.)

Voltage Rating: Type B, 600V, (UL 1429: 150V).
