

D E S C R I P T I O NPRODUCT COVERED:

Power Cord Receptacles, Cat. Nos. 206637, 208368 and 211395. Prefixes and/or Suffixes 0 through 9 may or may not be used to indicate variations (color change, plating, etc.).

ENGINEERING CONSIDERATIONS (NOT FOR UL REPRESENTATIVE USE):

General Character and Use - These devices are motor attachment plugs, factory assembled on insulated conductors for use within electrical equipment which are submitted to Underwriters Laboratories Inc., and where the use has been investigated and found to satisfy the following conditions of acceptability.

Conditions of Acceptability - In order to be considered acceptable as components of electrical equipment, the following conditions should be satisfied.

1. These devices are for use with connectors rated 15 A, 250 V.
2. The current carried by each pole shall be judged under the requirements applicable to the electrical equipment in which the devices are used with respect to operating temperatures, and the ampacity of the conductor.
3. The temperature of the supporting body should not exceed 120°C.
4. The blades are intended to be factory wired with No. 16 AWG wire.
5. No tests were conducted on Cat. No. 208368.
6. The electrical and mechanical contact between the connector contacts and printed circuit board posts and printed circuit board and printed circuit board posts is to be evaluated.
