ETD-BL-1T-F- 10S

Timer relay with flash function and adjustable time

Data sheet 103619_en_03

© PHOENIX CONTACT - 2013-09-16

1 Description

Features

Compact timer relay in 6.2 mm housing for controlling time sequences.

The time is set on the front of the device using a labeled thumbwheel, which is recessed to protect against accidental modification. A screwdriver is used to change the settings (blade width 2.5 mm).

The compact timer relays are available with different time ranges as well as with a screw, spring-cage, and push-in connection.

- 6.2 mm narrow housing
- Flashing function
- Adjustable time
- Easy and accurate time setting
- Supply voltage 24 V DC
- Output: A floating PDT

\bigwedge	
<u> </u>	

WARNING: Correct usage in potentially explosive areas

The module is a category 3 item of electrical equipment. Follow the instructions provided here during installation and observe the safety instructions.

Never carry out work when voltage is present.

Make sure you always use the latest documentation. It can be downloaded from the product at phoenixcontact.net/products.

Conformance with EMC Directive 2004/108/EC

Noise immunity When being exposed to interference, there may be minimal deviations.	EN 61000-6-2
Noise emission	EN 61000-6-4

EN 50178

Conformance with LV directive 2006/95/EC

Electronic equipm. for electrical power installations according to

ing to

4 Block diagram

5 Safety regulations and installation notes

WARNING: Risk of electric shock

Never carry out work when voltage is present.

Installation notes

1	The category 3 device is suitable for installation in the zone 2 potentially explosive area. It fulfills the requirements of EN 60079-0:2009 and EN 60079-15:2010.
()	NOTE: Installation, operation and maintenance may be carried out only by qualified electricians. Follow the specified installation instructions. When installing and operating the device, the applicable safety directives (including national safety directives), accident prevention regulations, as well as general technical regulations, must be observed. The technical data should be taken from this data sheet and the certificates (conformity assessment, other possible approvals).
(!)	NOTE: Do not open the device or make changes to it. Do not repair the device yourself, replace it with an equivalent device. Repairs may only be carried out by the manufacturer. The manufacturer is not liable for any damage due to violation of the described regulations.
()	NOTE: The IP20 degree of protection (IEC 60529/EN 60529) of the device is intended for a clean and dry environment. Do not subject the device to any load that exceeds the described limits.
Λ	WARNING: Explosion hazard
	The device has not been designed for use in potentially dust-explosive atmospheres.

Installation in Ex area (zone 2)

NOTE: Please observe the requirements defined for use in potentially explosive atmospheres!

WARNING: Explosion hazard

The device should be installed in a housing (control or distributor box) that fulfills the requirements of EN 60079-15 and at least IP54 (EN 60529) degree of protection.

WARNING: Explosion hazard

When installing and connecting the supply and signal circuits observe the requirements of EN 60079-14. Only devices suitable for operation in Ex zone 2 and the conditions at the application site may be connected to the circuits in zone 2.

WARNING: Explosion hazard

Cables may be connected and disconnected in potentially explosive areas only when power is disconnected.

WARNING: Explosion hazard

The device must be stopped and immediately removed from the Ex area if it is damaged or was subject to an impermissible load or stored incorrectly or if it malfunctions.

You can download the latest documents at www.phoenixcontact.net/products.

6 Structure

- 1 Knurled wheel for setting the time
- 2 LED U/t (green): Supply voltage and adjustable time
- 3 LED R (yellow): Output relay

7 Installation

WARNING: Risk of electric shock

Never carry out work when voltage is present.

The module can be snapped onto all 35 mm DIN rails according to EN 60715.

UL requirement: Use copper cables approved for at least 75°C.

Power supply

The module is supplied with 24 V of DC voltage.

8 Time setting

The time can be adjusted variably using a screwdriver (blade width 2.5 mm). The value set on the knurled wheel multiplied by 10 gives the percentage set value of the time end value.

Example:

Time end range of the time relay = 10 s

1 Setting on the knurled wheel = 6 $6 \times 10 \% = 60 \%$ Time end range of the time relay = 10 s 60 % of 10 s = 6 s

According to the setting of the knurled wheel (1...10), you can also read the time directly from the "Time setting for different time setting ranges" table.

Position Knurled wheel	0.1 - 10 s time [seconds]	3 - 300 s time [seconds]	0.3 - 30 min time [minutes]	3 - 300 min time [minutes]
0	0,1	3	0,3	3
1	1	30	3	30
2	2	60	6	60
3	3	90	9	90
4	4	120	12	120
5	5	150	15	150
6	6	180	18	180
7	7	210	21	210
8	8	240	24	240
9	9	270	27	270
10	10	300	30	300

Time settings for various time setting ranges:

The following table shows some examples: All intermediate values (e. g. 1.5) can be adjusted. The smallest adjustable time is reached at position "0". No time can be set between "10" and "0". This area is identified with a quickly flashing geed LED.

9 Diagnostics

The LEDs indicate the following error states:

LED U/t (green, backlighting of the knurled wheel)

- Flashes: Voltage is present, the set time is elapsing
- Flashing quickly: Undefined time range between "10" and "0" adjusted
- On: Voltage is present, the set time has elapsed

LED R (yellow)

- On: The output relay has picked up
- Off: The output relay is dropped

10 Connection example

11 Function

F: Flashing beginning with pulse

When supply voltage U is applied, the output relay picks up (yellow LED R lights up) and the set time t starts running (green LED U/t flashes). After time t has elapsed, the output relays drop out (yellow LED R is not lit) and the set time t starts running again. The output relay is activated at a ratio of 1:1, until the supply voltage is interrupted.

Since only one time setting is possible, the pulse and pause times are identical for the flasher function.
