

# Compliant with European standards 1a/1c 6A Slim power relays

# PF RELAYS (APF)

**Compliance with RoHS Directive** 

# **FEATURES**

1. High density mounting with 5 mm .197 inch width

Space saved with 5 mm .197 inch slim type with 28 mm 1.102 inch length.
Allows high density mounting and use in compact devices.

- 2. Satisfies reinforced insulation standard (EN/IEC 61810-1).
- 3. High switching capacity

Supports 6A 250 V AC nominal switching capacity (resistive load) and AC15 and DC13 (inductive load).

- 4. 1 Form A and 1 Form C contact arrangements with options for a variety of applications.
- 5. 4,000 V high breakdown voltage and 6,000 V high surge breakdown voltage.

Controller protection against surges and noise with a breakdown voltage of 4,000 Vrms for 1 min. between contacts and coil, and 6,000 V surge breakdown voltage between contacts and coil.

- 6. Resistance to heat and fire; EN60335-1, clause 30 (GWT) approved.
- 7. Sealed construction allows automatic washing.
- **8. Complies with all safety standards.** UL/C-UL, VDE certified.

## TYPICAL APPLICATIONS

- 1. Interface relays for programmable controllers
- 2. Output relays for measuring equipment, timers, counters and temperature controllers
- 3. Industrial equipment, office equipment
- 4. Household appliances for Europe

# ORDERING INFORMATION

Note: Certified by UL/C-UL and VDE

# PF (APF)

# **TYPES**

| Contact arrangement               | Nominal coil voltage | Part No. |  |
|-----------------------------------|----------------------|----------|--|

Notes: \*1. This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the actual load.

- \*2. Wave is standard shock voltage of ±1.2×50µs according to JEC-212-1981
  \*3. The upper operation ambient temperature limit is the maximum temperature that can satisfy the coil temperature rise value. Refer to "Usage, transport and storage" conditions" in NOTES.
- \*4. For cycle lifetime, refer to "Cautions for use 4)" in NOTES.

# REFERENCE DATA

#### 1. Electrical life

Tested sample: APF30224

| Load type      |        | Voltage | Current | Ambient temperature | No. of ops. |

# **NOTES**

### ■ Usage, transport and storage conditions

- 1) Temperature:
- -40 to +85°C -40 to +185°F
- 2) Humidity: 5 to 85% RH

(Avoid freezing and condensation.) The humidity range varies with the temperature. Use within the range indicated in the graph below.

3) Atmospheric pressure: 86 to 106 kPa Temperature and humidity range for usage, transport, and storage

4) Condensation Condensation forms when there is a sudden change in temperature under

high temperature and high humidity conditions. Condensation will cause deterioration of the relay insulation.

5) Freezing

Condensation or other moisture may freeze on the relay when the temperatures is lower than 0°C 32°F. This causes problems such as sticking of movable parts or operational time lags. 6) Low temperature, low humidity environments

The plastic becomes brittle if the relay is exposed to a low temperature, low humidity environment for long periods of

# For Cautions for Use.
