

AN8847SB

Head amplifier IC for CD-ROM drive (for 32 times speed or more)

■ Overview

The AN8847SB is a head amplifier IC for digital servo. It can configure an efficient CD-ROM system in combination with the MN662753, and allows a full-automatic adjustment of tracking balance-gain-offset and focus balance-gain-offset with fewer external parts.

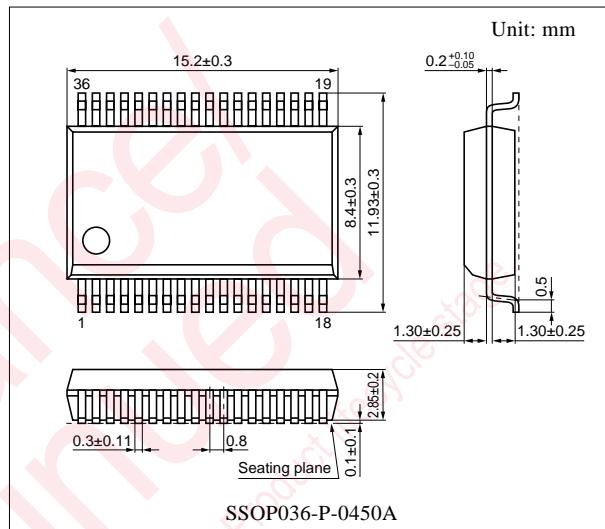

Built-in functions are a variable equalizer, high band RF amp. and AGC which meet CAV playback with 32 times speed or more.

■ Features

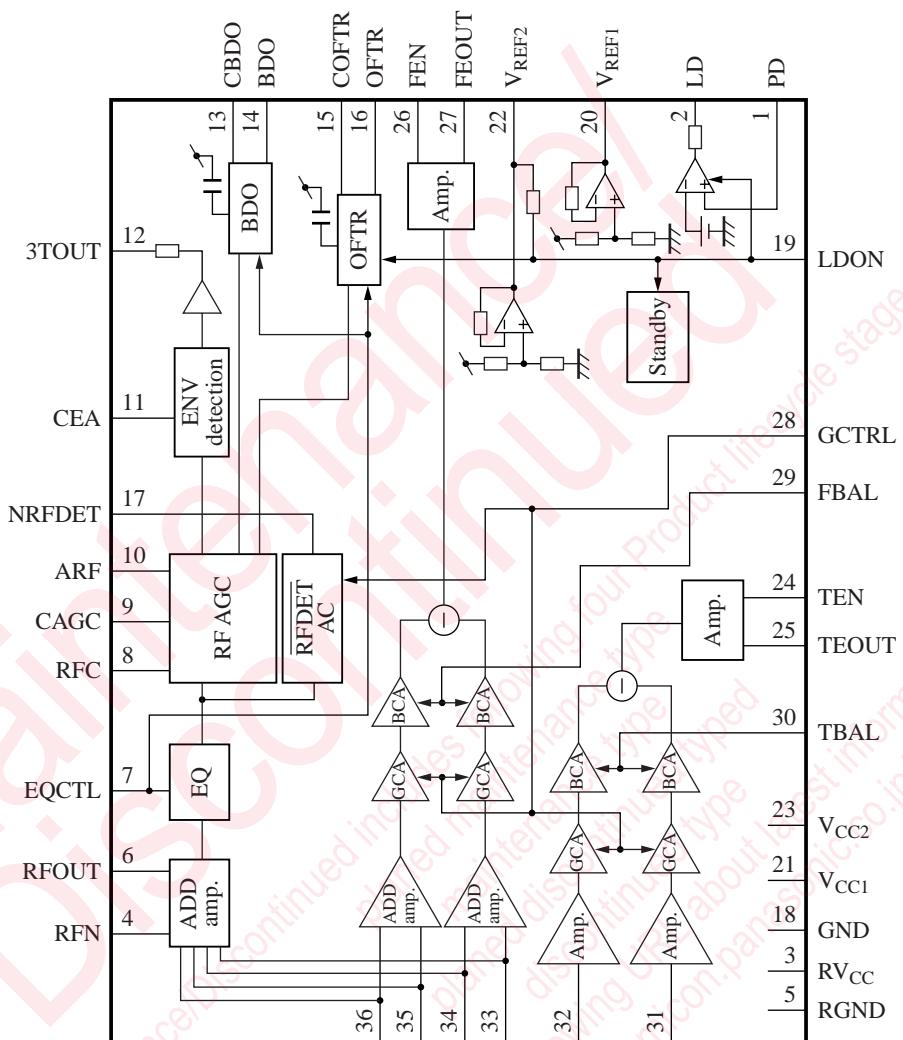

- Variable equalizer which meets CAV playback with 32 times speed or more.
- Wide band RF amp. and AGC ($f_C = 30$ MHz or more (-3 dB))
- Balance adjustment function built-in
Focus error amp./tracking error amp.
- CD-RW playback compatible.
Variable gain
Focus error amp./tracking error amp.
(to +16.9 dB)
- OFTR/BDO detection
- APC amp.

■ Applications

- CD/CD-ROM drive

■ Pin Descriptions

Pin No.	Description	Pin No.	Description
1	APC amp. input pin	18	GND pin
2	APC amp. output pin	19	APC & standby control pin
3	Power supply pin (R)	20	V _{REF1} output pin
4	RF addition amp. inverted input pin	21	Power supply pin 1
5	GND pin (R)	22	V _{REF2} output pin
6	RF addition amp. output pin	23	Power supply pin 2
7	EQ characteristics control pin	24	TE amp. inverted input pin
8	Capacitor connection pin for HPF of AGC input	25	TE amp. output pin
9	AGC loop filter connection pin	26	FE amp. inverted input pin
10	AGC output pin	27	FE amp. output pin
11	Capacitor connection pin for HPF amp.	28	GCTL pin
12	3TENV output pin	29	FBAL control pin
13	Capacitor connection pin for RF dark-side envelope detection	30	TBAL control pin
14	BDO output pin	31	Tracking signal input pin 1
15	Capacitor connection pin for RF right-side envelope detection	32	Tracking signal input pin 2
16	OFTR output pin	33	Focus signal input pin 4
17	NRFDET output pin	34	Focus signal input pin 2
18		35	Focus signal input pin 3
19		36	Focus signal input pin 1

■ Absolute Maximum Ratings

Parameter	Symbol	Rating	Unit
Supply voltage R *1	V _{CCR}	5.8	V
Supply voltage 1 *1	V _{CC1}	5.8	V
Supply voltage 2 *1	V _{CC2}	5.8	V
Supply current R *1	I _{CCR}	97.1	mA
Supply current 1 *1	I _{CC1}	7.4	mA
Supply current 2 *1	I _{CC2}	2.43	mA
Power dissipation *1, *2	P _D	403	mW
Operating ambient temperature *1	T _{opr}	-20 to +75	°C
Storage temperature *1	T _{stg}	-55 to +125	°C

Note) *1: Except for the power dissipation, operating ambient temperature and storage temperature, all ratings are for T_a = 25°C.

*2: The value for the independent package (without a heat sink) at T_a = 75°C.

■ Recommended Operating Range

Parameter	Symbol	Range	Unit
Supply voltage R	V _{CCR}	4.5 to 5.5	V
Supply voltage 1	V _{CC1}	4.5 to 5.5	V
Supply voltage 2	V _{CC2}	3.0 to 5.5	V

■ Application Circuit Example

Request for your special attention and precautions in using the technical information and semiconductors described in this book

- (1) If any of the products or technical information described in this book is to be exported or provided to non-residents, the laws and regulations of the exporting country, especially, those with regard to security export control, must be observed.
- (2) The technical information described in this book is intended only to show the main characteristics and application circuit examples of the products, and no license is granted under any intellectual property right or other right owned by our company or any other company. Therefore, no responsibility is assumed by our company as to the infringement upon any such right owned by any other company which may arise as a result of the use of technical information described in this book.
- (3) The products described in this book are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances). Consult our sales staff in advance for information on the following applications:
- Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
 - Any applications other than the standard applications intended.
- (4) The products and product specifications described in this book are subject to change without notice for modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.
- (5) When designing your equipment, comply with the range of absolute maximum rating and the guaranteed operating conditions (operating power supply voltage and operating environment etc.). Especially, please be careful not to exceed the range of absolute maximum rating on the transient state, such as power-on, power-off and mode-switching. Otherwise, we will not be liable for any defect which may arise later in your equipment.
- Even when the products are used within the guaranteed values, take into the consideration of incidence of break down and failure mode, possible to occur to semiconductor products. Measures on the systems such as redundant design, arresting the spread of fire or preventing glitch are recommended in order to prevent physical injury, fire, social damages, for example, by using the products.
- (6) Comply with the instructions for use in order to prevent breakdown and characteristics change due to external factors (ESD, EOS, thermal stress and mechanical stress) at the time of handling, mounting or at customer's process. When using products for which damp-proof packing is required, satisfy the conditions, such as shelf life and the elapsed time since first opening the packages.
