

VOLTREX™

To build a better and broader product offering for their customers, Voltrex products have migrated into either Multicomp or Pro-power, based on technology. It is important to know that **the part number and physical product have NOT changed, though product packaging and data sheets may refer to Voltrex for a brief time period while being modified.** To continue your search, please select from either brand below based on the type of product you need. Thank you for your patience and business during this transition in the Value Brands.

multicomp
